AIRLINE OPERATIONS AND DELAY MANAGEMENT

This paper aims to capture the interdependency among the sequence of flight delays due to airline operations in airports, weather, and air traffic control conditions. A copula function is used to determine the distribution of delay sequence and examine the propagation effects. Using the actual data sourced from an airline in Asia Pacific region, it is found that flight delays could propagate ...

Comparative Analysis on Propagation Effects of Flight ...

both in the pre-departure and airborne phases of delay cost management. We also examine some hypothetical scenarios for the distribution of Air Traffic Flow Management (ATFM) slots, exploring these in terms of their cost and target-setting implications. The cost of delay to airline operations comprises several components.

The challenge of managing airline delay costs

often call for the implementation of a ground delay program, a ground stop, or playbook reroute. At a lower level, airline responses to these same disruptions or a higher level disruption response, include flight delays, flight cancellations, the addition of new flight segments, and new flights. Considering the number of deviations and their
