Engineering Goals: Discuss how to make supports for the bridges using trusses and arcs. Leader Instructions/Tips: Create a "ocean" with two "land masses" on either side to use as the testing station. We used a sink, but two chairs across from each other would also work. This way students can come up and measure how big their bridge will need to be.

Bridge Building — Educating Young Engineers

Building Bridges for Youth Building Bridges for Youth works to develop young people's (ages 12 - 25) knowledge of inequities in their families, schools and communities, so they can begin practicing, by themselves and with others, ways to challenge and transform those inequities. Building Bridges for Youth offers structured opportunities for young people to engage [...]

Building Bridges for Youth | CCEJ

The actual building process (balancing blocks to build a bridge) offers reliable and authentic cause-and-effect experiences and provides information about whether a prototype will work.
