In Melodyne Plugin, it is not necessary to save your work manually, as this is done automatically by the DAW project. If you want to save the contents of Melodyne Plugin as an audio file, you must use the bounce/render function of your DAW. Each time audio material is transferred, Melodyne Plugin makes a copy of the new segment.

Melodyne editor 2 Online Manual | Quick Start Guide

Melodyne is pitch correction software that works by receiving recorded audio and analyzing the pitch and tempo. It then separates the notes into blobs, which you can then edit individually as necessary. There are a few ways to import audio; either through your DAW as an effects plug-in or

recording/importing the audio using the standalone app.

Celemony has also improved the accuracy of its Melodic algorithm, as we learn when we compare a singer's performance in Melodyne 4 and 5, with automatic pitch quantisation applied, and hear a subtle difference. Celemony says the algorithm listens the way humans do, rather than taking an average pitch over a note's duration.
