This review will focus specifically on a representative chapter—in this case, Chapter 7: Cellular Respiration. I compare the chapter from Biology 2e to both the first edition Openstax Biology and a traditional introductory text from a major publisher. I selected Cellular Respiration because this is a complex, multi-step concept which is challenging for many students. In terms of ...

Photosynthesis and cellular respiration (including anaerobic processes) provide most of the energy for life processes. Plants or algae form the lowest level of the food web. At each link upward in a food web, only a small fraction of the matter consumed at the lower level is transferred upward, to produce growth and release energy in cellular respiration at the higher level. Given this ...
