NOVA - Official Website | Classifying Life

To classify an organism, scientists often use a dichotomous key. A dichotomous keyis a listing of specific characteristics, such as structure and behavior, in such a way that an organism can be identified through a process of elimination. In this investigation, it is expected that you: 1) Use a key to identify 14 shark families.

Classifying Sharks using a Dichotomous Key

Scientists classify organisms into a hierarchy that begins with kingdom and works its way deeper into phylum, class, order, family, genus, and species. For those new to this system, it can be a challenge simply remembering these categories. Here's a mnemonic referring to 16th-century Spanish exploration that might help:
