Product design determines how a product looks and how it is organized. An important part of product design is deciding which features are included and which are left out. You also have to think about which features should be prioritized and built first. It's hard to say exactly what makes something well designed *or* not.

Technology, Product Design, and User Experience - Prototypr

posted by John Spacey, April 14, 2016 updated on June 02, 2018. Technology design is the practice of creating technology products, services and environments. This is not a single practice but is rather a collection of design practices that include:
