Technical Manual Index - GE Aviation

The newest T700 engine, the T700-GE-701D, provides the latest technologies for field-proven engines. The T700-701D comes with 1,994 shp and features 6 compressor stages and 4 turbine stages (2HP-2LP). The U.S. Army is currently upgrading its fleet of UH-60A/L Black Hawk helicopters to the UH-60M configuration, which includes upgrading the older T700-GE-700 engines to the more powerful and durable T700-GE-701D configuration.

General Electric T700-GE-701 Turboshaft Engine | PowerWeb

an engine is not operating. Therefore, there is no torque reaction during autorotation. The usual method of counteracting torque in a single main rotor is by a tail (anti-torque) rotor. This auxiliary rotor is mounted vertically on the outer portion of the tail boom. The tail rotor and its controls counteract torque, and provide a means to

CHAPTER 7 HELICOPTERS AND TURBOSHAFT POWER PLANTS

The T700-GE-700 was followed by improved and updated Army engine variants for the UH-60 Black Hawk and the AH-64 Apache helicopters, as well as marineized naval engine variants for the SH-60 Seahawk derivative of the Black Hawk, the SH-2G Seasprite, and the Bell AH-1W Supercobra.

General Electric T700 - Wikipedia

GE's successful T700/CT7 family of turboprop and turboshaft engines powers 25 types of helicopters and fixed-wing aircraft with more than 130 customers in more than 50 countries. Built on the highly reliable T700, the CT7 engine design has proven itself in harsh environments and has achieved over 37 million engine cycles.
