Nikon | Download center | D5100

This can be another reason to change to manual focus selection. For moving subjects it is best to use the setting „dynamic“ and to follow your subject with a focus point. The tracking with the D5100's 11 focus points and small gaps in-between does not work as well as with 39 or even 51 focus points that other more expensive Nikon models have.

Nikon D5100 Guide: Autofocus settings / AF-area mode ...

Some subjects confuse even the most sophisticated autofocus systems, causing a camera's autofocus motor to spend a long time "hunting" for its focus point. Autofocus systems also struggle in dim lighting, although that difficulty is often offset on the Nikon D3100, D5100, or D7000 by the AF-assist lamp, which shoots out a beam of light [...]

Nikon D5100 User's Manual in English | eBay

Focus confirmation does indeed work. I have a D7000 (which is ergonomically very similar to a D600 - think of a D600 as a D7000 with an upgraded sensor) and have been using a Nikon 80-200mm f/4.5 AI on it perfectly fine. I just rotate the focus dial until the green confirmation dot shows up on the screen.

When using manual focus on the D5100 and a 18-55mm lens with the viewfinder, in the bottom left hand corner there is a little green dot or light. When that is on steady the lens is focused properly. Also when in auto focus there is normally a beep when the lens is in focus.

Manual focus option is always disabled - Nikon D5100 Forum

The Nikon D5100 is a 16.2-megapixel DX-format DSLR F-mount camera announced by Nikon on April 5, 2011. It features the same 16.2-megapixel CMOS sensor as the D7000 with 14-bit depth, while delivering Full HD 1080p video mode at either 24, 25 or 30fps.The D5100 is the first Nikon DSLR to offer 1080p video at a choice of frame rates; previous Nikon DSLRs that recorded 1080p only did so at 24 fps.
