Phonology and Second Language Acquisition : Jette G ...

The phonology of second languages is different from the phonology of first languages in various ways. The differences are considered to come from general characteristics of second languages, such as slower speech rate, lower proficiency than native speakers, and from the interaction between non-native speakers' first and second languages. Research on second-language phonology has been done not only on segments, but also on prosody. Second-language prosody, like second-language ...

Second-language phonology - Wikipedia

Phonological development is the acquisition of sounds in order to pronounce words. Child Language Acquisition begins at birth. The inner ear has the only bones in the whole body which are fully formed at birth, thus enabling the child to start recognising their mother's voice in the first day of living and also allowing the child to differentiate one language from another at such an early stage.
