Ch 16 Reproductive System Answer Key

Study Guide - Answer Key Reproductive System 1. Distinguish between a gamete and a gonad using specific examples from the male and female systems. Gonads are the organs of the reproductive system that produce the gametes (haploid sex cells) Male gonads are the testes that produce sperm which are the male gametes

Study Guide - Reproductive System (KEY)

THE REPRODUCTIVE SYSTEM The biological function of the reproductive system is to produce offspring. The essential organs are producing germ cells (testes in males and Ovaries in females). The male manufactures sperm and delivers them to the female's reproductive tract. The female, in turn, produces eggs.
