The Nine Billion Names Of

"The Nine Billion Names of God" is a 1953 science fiction short story by British writer Arthur C. Clarke. The story was among the stories selected in 1970 by the Science Fiction Writers of America as one of the best science fiction short stories published before the creation of the Nebula Awards. It was reprinted in The Science Fiction Hall of Fame, Volume One, 1929-1964

The Nine Billion Names of God - Wikipedia

Directed by Dominique Filhol. With Paul Bandey, Rotem Jackman, Guéshé Lundup, Lennard Ridsdale. 1957, New York. A Tibetan monk rents an automatic sequence computer. The monks seek to list all of the names of God, and they hire two Westerners to install and program the machine.

The Nine Billion Names of God (2018) - IMDb

The Nine Billion Names of God Arthur C. Clarke "This is a slightly unusual request," said Dr. Wagner, with what he hoped was commendable restraint. "As far as I know, it's the first time anyone's been asked to supply a Tibetan monastery with an Automatic Sequence Computer.

Arthur C. Clarke: The Nine Billion Names of God

"The Nine Billion Names of God" challenges the popular rationalist resonances of the mid-1950s, which emerged partly out of the first groundbreaking advances in computation. It poses, instead, a future where spirituality remains most closely in touch with the universe's fundamental laws, depicting the shock a modern rationalist would experience to see his belief system thwarted a ...

The Nine Billion Names of God Summary | SuperSummary

The Nine Billion Names of God published in 1953 demonstrates just this, in which the story's main characters are caught between their logic and that of another group. Clarke's short story addresses the conflict between technology or science and religion.

Nine Billion Names of God Essay - 534 Words

Short story by Arthur C. Clarke in which a group of monks buys a computer to calculate all the names of God.. There's even a distributed computing webpage which proposes this project: "In the same vein as the RC5 and DESII challenges, we will attempt to harness the idle computing power of the world to find the 9 billion names of God and bring about the destruction of the universe through the ...

Nine Billion Names of God - Everything2.com

The Nine Billion Names of God is another religiously rooted story about monks getting a supercomputer to find all names of God to be ready when he comes. There are some stories about anti-gravity, new worlds, horse like creatures who meet tiny creatures who may outsmart them before too long.

The Nine Billion Names of God: Clarke, Arthur C ...

Three centuries ago, the monks created an alphabet in which they calculated they could encode all the possible names of God, numbering about 9,000,000,000 ("nine billion") and each having no more than nine characters. Writing the names out by hand, as they had been doing, even after eliminating various nonsense combinations, would take another ...
